PERSONAL PROFILE

I am a highly motivated and attentive computing student with tested programming , project management , and interpersonal skills . I am passionate to grow and build technology platforms with global impact. I love to engage and collaborate with fellow developers and build my professional network .

PROJECTS (EXPERIENCE)

Kisan Bazar (Auction based platform for farmers) MERN Stack , socket.io

System build for our farmers to sell their products without middlemen . System is based on live auction using socket.io for the products , farmers can keep track of their products and their current prices and sell their products to highest bidder .

SudoKode (Reminder app for Data structure and algo) MERN Stack

For keeping our fellow developers motivated to code I created a platform to keep track of their profiles on different platforms .With the ability to get reminded to do different coding problems daily from different websites like leetcode , codeforces etc.

BusiAnalytix MERN Stack

We provide a solution for different merchants on shopify , wordpress , magento .With a dashboard for users , they can monitor their product views on respective websites . The EP (Event Processing) System counts the unique visits on each products and update if certain threshold set by our user is reached on respective stores .
